AICT Lab Project – First Semester

Web Development Project

Total Marks: 30

Project Title:

Website Design Using HTML and CSS

Objective:

The goal of this project is to design a fully functional and visually appealing website using only HTML and CSS. This project will help students understand the basics of web structure, styling, and linking multiple pages.

Project Description:

Students will create a website based on any real-life topic of their choice, such as:

- Hotel Website
- Restaurant Website
- Book Shop
- Coffee Shop
- Boutique
- Tech Store
- Travel Agency
- School Management System
- Pet Store
- Online Bakery

The website must include 10 web pages. All pages should be linked together and included in the navigation bar (menu).

Required Web Pages (Minimum):

1. Home Page
2. Login Page
3. Sign-Up Page
4. Inventory/Product Page
5. Purchase Page
6. About Us

7. Contact Us
8. Gallery Page
9. Services Page
10. Feedback/Testimonial Page

Note: You can add more than 10 pages if desired, but 10 is the minimum.

Technical Requirements:

- Use only HTML and CSS
- No JavaScript, PHP, or frameworks
- All pages must be connected through a common navigation bar (APS - All Pages System)
- Web design must be responsive (optional for extra marks)
- Website must be user-friendly and creative
- Attractive and relevant images must be used
- Use form elements in login, sign-up, and feedback pages
- Must include tables, lists, buttons, and links
